

droplet®

Revolutionising how we tackle dehydration
in hospitals, care homes and in the home.

Hydration for life

“Droplet® supports the crucial element of hydration for healthcare professionals to monitor, manage and improve patients fluid intake. This is why at Musgrove Park we are introducing Droplet® in every ward.”

Phil Shelley, Past National Chair of the Hospital Catering Association

Droplet's unique Smart Base has flashing reminder lights and plays personalised messages, which encourage patients and residents to drink more. The Smart Base attaches to the Mug or Tumbler.

The results of the Droplet® trials at Musgrove Park Hospital and in care homes speak for themselves.

*The average daily increase in fluid intake compared to pre-Droplet® consumption in care homes and control groups in hospital (8 weeks, 45 patients in care homes & 5 days, 43 patients in 4 hospital wards).
